# A+

Could be  
better? Just  
**excellence**

excellence  
by cupa

Cupa Natural Slate has achieved an **A+ rating** for the lowest environmental impact in the **BRE Green guide** to Specification. No other natural slate has ever been awarded with this certification.

We want to share our success with a special deal when choosing any slate from the excellence range. For **every 6 pallets** ordered Cupa will send a box (6un) of **one of the finest wines** from the area where slate is produced, North West of Spain.

Cupa has selected for you another excellence, **Baltos**, a wine elaborated from 40 year old dry farmed bush wines of mencia grape variety. Few varieties express better than mencia the terroir of a region of calcareous clay and slate substrata.

Cupa invites you to enjoy this combination of fruity and mineral characteristics that have shot Baltos into the international stage.
