INSULATED COMPOSITE PANEL SYSTEMS

For Pitched roof or Wall application.

- Faster installation
- Approved for LPCB
- High thermal performance
- Environmental sustainable PIR
- White Polyester liner

TILEFORMED METAL ROOF SHEETS & PANEL

FIBRE CEMENT SHEETING

- Easy to handle
- Highly cost-effective
- Low maintenance
- Does not rust, rot or corrode
- Resistant to chemical attack
- Excellent noise and thermal insulation

URBAN PRO

A semi-compressed fibre cement sheet. Easy to handle and suitable for smaller structures such as garages and housing in the equestrian, industrial and domestic market.

FARMTEC

Designed specifically with farmers in mind. This product has polypropylene reinforcement strips that run along the full length of the sheet to help with impact and handleability.

B5 CORRUGATED SHEET

B5 is a replacement for the standard 3 inch profile corrugated sheet, the B5 is a more modern profile that can be used at a lower pitch with smaller over laps.

PROFILED BOX & SINUSOIDAL METAL SHEETING

We offer custom length Sheeting, as well as our Standard stock sizes.

All associated GRP Rooflights, Flashings, Sealants and Fixings available.
